Saksham Shukla

Product Designer | AI, Conversational & Automotive UX

India · works remote shuklasaksham01@gmail.com linkedin.com/in/saksham-shuklaa

Product designer with 4.5+ years leading end-to-end design for AI-powered, conversational and in-vehicle products at Verizon and HARMAN, and founder of Bracket, an AI-native decision OS.

EXPERIENCE

Founder & Product Designer · Bracket (side venture)

2026 – Present · Remote

- Designed and launched an AI decision OS for freelancers and small teams (live, v0.4): human-in-the-loop review of AI-detected scope, date and price changes, 173 screens and a 53-component design system.
- Led product strategy, research and design from concept to launch.
- Designed human-in-the-loop AI workflows that turn unstructured client conversations into structured decisions, with evidence and confidence shown for every AI claim.
- Built a tokenized design system (53 components) and 173 desktop and mobile screens, with clickable prototypes for developer handoff.

Experience Designer II · Verizon

2025 – Present · Remote, India

- Designer on the tello.ai team (AI conversational assistant for Total Wireless), focused on cutting customer steps; in a 4-week A/B test with 2,400 users, plan selection became 5× faster, conversion rose 7%, CSAT rose 12% and funnel drop-off fell 6%.
- Prototyped a conversational phone activation flow that replaces a 12+ screen form with one conversation, using camera scanning for IMEI, SIM number, and plan PIN.
- Worked with designers, product managers and engineers from research to high-fidelity UI.

Experience Designer · HARMAN International

2024 – 2025 · Bengaluru

- Redesigned the in-vehicle audio interaction model for a Hyundai × Audio by Bang & Olufsen concept, validated in the car: navigation from 3 layers to 1, interaction time cut by 40%.
- Achieved 76% user satisfaction while reducing driver distraction by 10%.
- Partnered with engineering to ship production-ready experiences across global vehicle platforms.

Associate Experience Designer · HARMAN International

2022 – 2024 · Bengaluru

- Designed One Audio, a connected multi-device experience for Harman Kardon: 65% faster device setup, +13% multi-device usage; showcased in HARMAN's AutoOne cockpit at CES 2025.
- Achieved a 4.2 satisfaction rating in prototype validation with about 2,000 US participants.
- Supported end-to-end design from research through developer handoff on the connected-audio design system.

SKILLS

AI & emerging tech: AI-assisted design, Conversational UX, Agentic AI, Human-AI interaction, Voice UI, Prompt-driven workflows

Product design: UX & UI design, Interaction design, Information architecture, User flows, Prototyping, Automotive HMI

Product & strategy: Product strategy, 0 → 1 development, Roadmapping, Stakeholder alignment, Cross-functional collaboration

Design systems: Component libraries, Design tokens, Atomic design, Accessibility, Documentation

Research: User interviews, Usability testing, Journey mapping, Competitive analysis, Design validation

Tools: Figma, FigJam, ProtoPie, Framer, Photoshop, After Effects, Miro, Notion

EDUCATION

B.Tech, Electrical & Electronics Engineering — United College of Engineering & Research, Prayagraj · 2018 – 2022
